

AviNet Mail Enterprise Hub (eHub)

AviNet Mail eHub is a multi-user web-based service that gives you full control of your messaging environment, with a service wrap that delivers dynamic on-demand functionality. Supporting both human and system generated messaging, AviNet Mail eHub is designed to ensure direct and easy replacement of older legacy messaging gateways, giving you access to new technologies.

With the integrated eHub connector handling third party applications, eHub provides a complete messaging solution for any aviation industry business. With no hardware or software licence fees required and free local traffic routing, eHub brings significant cost reductions across all areas of your operation.

Whether single or multi-user, eHub can provide simple user management at varying levels and divisions, offering the ability to meet the needs of the most diverse industry organisations.

The Next Generation Messaging Hub for the Air Transport Industry

With over 80 years of experience in air transport IT and communications, ARINC stands at the forefront of aviation messaging.

ARINC's services and solutions are driven by the evolving needs of the aviation industry. ARINC was the first aviation messaging provider to harness the power of the internet, bringing flexibility and cost efficiencies to the community in the form of AviNet Mail.

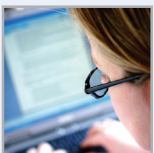

Over the last 10 years, the need to move to web based services has increased dramatically, eHub gives customers the flexibility they need to manage changing business and operational requirements within an increasingly competitive market. AviNet Mail eHub is part of ARINC's continued commitment to delivering significant cost efficiencies across the whole messaging environment.

ARINC
